

KEY PEOPLE INDICATOR™

Who Are Your *Key Influencers*?

Typical 360 Approach

- Feedback in weeks
- Participants select raters
- Biased ratings
- Individual results

Invitation to select raters

Rater selection reminders

Selection of raters

Rater invitation to provide feedback

Provide feedback reminders

Survey cut-off

Our Approach

- Feedback in days
- Raters select participants
- Normalized ratings
- Organizational insights

Rater invitation to provide feedback

Provide feedback reminders

Survey cut-off

360 FEEDBACK

The Key People Indicator (KPI) is a rater-driven assessment dedicated to uncovering organizational insights. An entire organization or group participates in the process at the same time, in a 7-10 day cycle.

Why KPI?

Raters choose who they would like to provide feedback for rather than participants selecting who to receive feedback from. This identifies influencers and provides results without rater bias.

How It's Measured

KPI scoring allows you to identify change agents, high potentials, areas of development, and more. Results are detail driven and customizable to fit your organizational needs.

WORK EFFECTS

Key People Indicator APPLICATIONS

SITUATION

Identifying Change Agents

A company wants to implement new technologies throughout the organization...

- Who is part of the design team?
- Who do we introduce the technologies to first?
- Who can we leverage for widespread adoption?

Find the Silos

Teams are not aligned with each other and have competing priorities, making it difficult to coordinate across functions...

- Where are silos?
- Which teams / functions are most silo'd?
- Who can I leverage to bridge the divides?

Determining Eligible Mentors

A company wants to start a mentorship program to facilitate rapid learning...

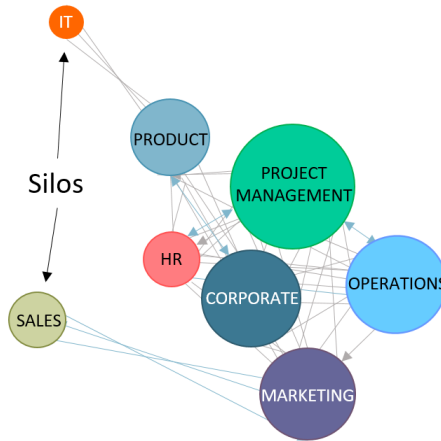

- Who are the most influential people?
- Who needs growth (at each level in the organization)?
- Who are my high-potentials?

SOLUTION

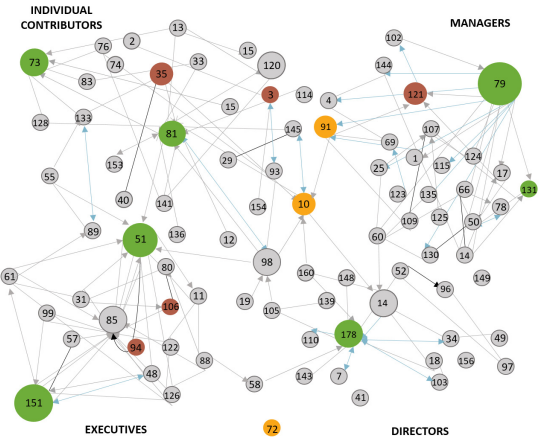

- Micro level group report results
- All participants utilize the same items

- Macro level group report results
- Different items based on the department/function

- Micro level group report results
- Different items based on organizational level

OUTCOMES

- Effective design team
- Faster roll out
- Sooner adoption of new technology
- Less resistance to change

- Identification of key influencers (formal and informal) in each function for optimized cross-team communication
- Ability to get the right people in the room at the right time
- Smooth information flow
- Better work outcomes

- Successful mentoring pairs to facilitate successful development
- Organic way to pass and share knowledge
- Creating a foundation for succession planning
